

**CSR Project Report Kadimi Tools Pvt. Ltd
for the period of Dec. 2015– March 2016 and
implemented by SightLife India**

PROVINDING VISION TO CORNEAL BLIND PATIENTS

Objective of the Project

The objective of the project is to provide support for the vision restoration of corneal blind patients, who are waiting for the corneas to get their sight and life back.

Project Start Date

Project started from December 2015

Mode of Operation

Two dedicated eye donation counselors are appointed to work at AIIMS Hospital, Delhi and Safdarjung Hospital. These EDCs are dedicated for the CSR project of Kadimi Tools. Two Eye Donation Counsellor's who are appointed in the two Hospital will work to motivate the family of deceased person in the Hospital and counsel them to donate the corneas of their beloved family member.

Name of the EDCs

Prem Chand and RishiRaj Kardam

Training for the Skill Development

Since these EDCs work in a difficult environment , they need a lot of motivational and skill development trainings to keep their morale high and both PremChand and Rishi Raj attended the in person as well as online training program to improve their counselling skills as well as to learn other required skills like documentation, contraindication, ocular anatomy etc.

Training of EDCs at SightLife India office, New Delhi

Results:

Because of the hard work of these Eye Donation Counsellor's from December 2015 – March 2016, 30 corneal blind patients were able to regain their sight/vision back. The vision restoration for these 30 Corneal blind patients not only changed the life of these patients but also the whole family got their life back. These patients who belong to different age group, different gender can now start their normal life and

be a part of the world which is not only colorful but also opens new avenues for these patients to start a new chapter of their life . A life full of hopes and dreams, a life full of colours and light

Bhoude (30 Years)

Surbhi (18 years)

Bhoude (30 years) and Surbhi (18 years) are two corneal blind patients which got treated and now they both are able to live a normal, healthy life and have hope and dreams. Bhoude can earn his living and Surbhi can have a normal healthy child life. Millions of such patients are still waiting for this miracle to happen in their life and every single eye donation contributes to change in life.

Sensitization of Nursing Staff in the Hospital

These counsellors not only worked hard for counselling the donor families but also did the hard work of educating the hospital staff at all levels, and made them aware about eye donation. This general awareness will help the cause of eye donation in long run.

Conclusion

Over all this CSR project with Kadimi Tools is a great success which not only resulted in 30 vision restoration but also helped in increasing the

overall awareness about eye donation and skill development of both the counsellors.

On behalf of the patients and the Counsellors SightLife India thanks and grateful of Kadimi Tools for their invaluable support and hope Kadimi Tools will continue extending their support in near future to SightLife India in their mission of elimination of corneal blindness.
